SUMMARY

I'm interested in Fullstack web development, I focus on crafting great websites using **ReactJS** for frontend, **NodeJS** or **PHP** for backend, I enjoy creating beautifully designed, intuitive and functional websites. I'm looking to improve my development skills with a good internship.

EXPERIENCE / PROJECTS (Check my GitHub for more)

Budgie

This app is a tool to track your expenses and analyze them with a graphical chart. Built with **ReactJS** (React router v6, Context api, Chart.js) and styled with **Tailwind css**. Live demo - budgie-app-yusufisawi.netlify.app/

Weather app

An app to lookup the weather forecast of a city or for your own IP via geolocation, Built with **ReactJS** and **OpenWeatherApi**, I also used framer motion for clean animations and **Tailwind CSS** for nice looking UI. Live demo - <https://weather-app-yusufisawi.netlify.app/>

So_long | (One of 1337 projects)

This is my favorite project at 1337 till now, it's about creating a small 2D game using only C language, it's purpose is to get you to work with textures, sprites, animations and some important algorithms such as Flood-fill algorithm. Code source - https://github.com/YusufLisawi/42-so_long

GreenWorks

This is a web application to create a digital eco-responsible solution, by connecting people's ideas to improve recycling, Built with PHP, Css, Vanilla JavaScript and MySQL. Code source - <https://github.com/YusufLisawi/GreenWorks>
